REMOTE PACKAGING & AI VISUALIZATION PARTNER

MARYAM PEYRAVI
Senior Packaging Visual Designer

P.VISUAL Packaging R&D Studio

High-End Packaging Graphics, AI Visualization & Production-Ready Prepress.

Backed by 20+ years of expertise in visual design, elevated with advanced structural packaging R&D.

HOW WE SUPPORT CREATIVE TEAMS

We operate as a flexible remote extensions team for design agencies and brand managers looking to handle project overflows, accelerate pitch turnarounds, or elevate technical visual presentations.

1. Visual Packaging
Bespoke logotypes, label graphics, and luxury visual branding tailored for F&B, health, and cosmetic sectors.

2. AI Visualization
Fast, photorealistic product scenes & 3D visual concepts generated for client pitch decks and launch assets.

3. Prepress & Print
Flawless, production-ready vector files built to exact printer dielines, specs, and color separation rules.

4. Structural CAD
Directing specialized mechanical CAD engineers to deliver custom box structures, dielines & physical prototypes.

STRUCTURAL R&D & TECHNICAL EXECUTION

Where Artistry Meets Precision Engineering: Every luxury package is engineered to balance tactile unboxing experiences with rigorous structural integrity.

Our integrated design system bridges creative graphics with millimetric CAD precision, custom hinge integration, and specialized material specifications.

Dieline Accuracy
Zero-error tolerance vector files aligned with manufacturing tolerances.

Tactile Mechanisms
Integrated magnetic closures, custom hinges, and velvet insert geometries.

Material Selection
Expert guidance on luxury papers, foil stamping, embossing & sustainable substrates.

Prototyping
Physical mockups and mechanical strain validation prior to mass production.

SEAMLESS REMOTE WORKFLOW & COLLABORATION

To guarantee absolute accuracy, eliminate miscommunication across time zones, and maintain clear records of technical specs, we utilize a structured 4-step remote process.

01 Written-First Communication
All technical specs, feedback, and revisions are recorded exclusively in writing (Email/LinkedIn) for exact quality tracking.

02 Brief & Alignment Deposit
Projects initiate with a clear scope document and a standard advance deposit before concept generation starts.

03 Concept & AI Visual Previews
High-resolution 3D renders and visual concepts are delivered for review, alignment, or client pitch deck inclusion.

04 Prepress Vector Delivery
Production-ready vector files, dielines, and print specifications are released upon final approval and project settlement.

INITIATE COLLABORATION
